

IS YOUR CLOUD ACTUALLY UNDER CONTROL?

Cloud doesn't fail, it drifts. When no one owns visibility, costs creep, access fragments, and issues take longer to resolve. **Answer honestly.**

Leadership Oversight Questions	Yes	No
Can you see total cloud spend and usage across <i>all</i> locations in one place?	☐	☐
Do you know who owns escalations when something breaks?	☐	☐
Are user access and licenses applied consistently across teams?	☐	☐
Are inactive accounts or unused resources reviewed monthly?	☐	☐
Can leadership forecast future cloud costs without requesting a spreadsheet?	☐	☐

If you answered **"No"** more than twice, you don't need a new cloud platform; you need **structure**.
